Annotate a pdf file with iPocket Draw

- Click on the icon :

- Click on « Annotate a pdf » and choose the pdf to annotate

- The current drawing is saved and closed

- All pages of the pdf are displayed with a zoom all command :

 Here it is a 2 pages pdf, one in landscape and one in portrait.

 - You can now annotate the pdf by using all drawing functions of iPocket Draw over the original pdf drawing.
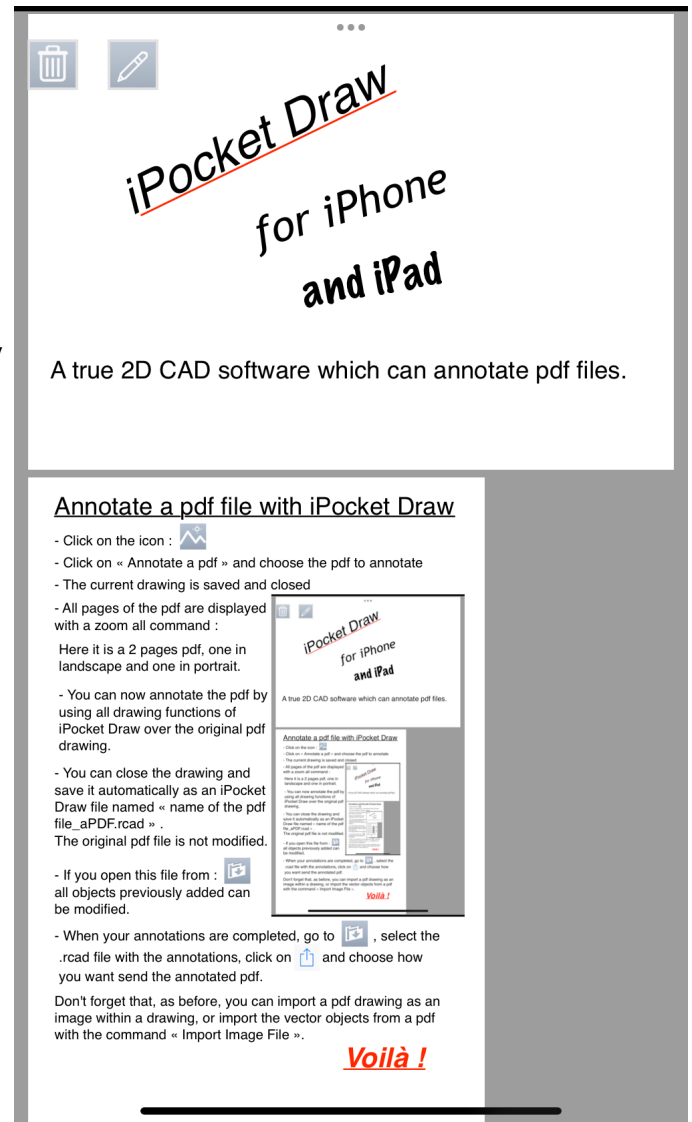

- You can close the drawing and save it automatically as an iPocket Draw file named « name of the pdf file_aPDF.rcad » .
The original pdf file is not modified.

- If you open this file from :
all objects previously added can be modified.

A true 2D CAD software which can annotate pdf files.

- When your annotations are completed, go to   , select the
 .rcad file with the annotations, click on   and choose how
 you want send the annotated pdf.

Don't forget that, as before, you can import a pdf drawing as an image within a drawing, or import the vector objects from a pdf with the command « Import Image File ».

Voilà !
